

228 EAST MAIN STREET, WESTMINSTER

ZIMMERMAN HOUSE

This is refreshing as an architectural rarity in Westminster. Its soul is clear - a normal small wood frame house of 3 bays, 2½ stories, side hall. However, its builder, Paul A. Zimmerman, adapted this basic form to fit the aesthetic needs (i.e., fashions) of the day. Zimmerman found the basic Westminster House an easy form to update, enlivening the skyline by adding a corner tower and different-sized gables, by using white imbricated shingles, and by stringing courses of turned spindles under the front porch's eaves. This totally 3-dimensional building marks a change in treatment, as many of the town's simple buildings easily could be read as paintings; this is one that makes good use of space and planes.

The land, half of lot 41 of the original town, remained unimproved until bought by Zimmerman in 1905. Zimmerman used the already existing building (226 East Main) as rental property, after he and his family moved into this house constructed (according to his daughter, the present owner) in 1906.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Huddled into the southwest corner of the intersection of Ralph Street and Main (Maryland Route 32) in Westminster is number 228 East Main Street, a small white Queen Anne - Eastlake House. Two and a half stories tall with a hexagonal three story tower, the house sits on the eastern half of lot 41 of the original town of Westminster.

The Main Street facade is dominated by the tower which acts as the eastern bay, and by the black asbestos covered 1 story shed roof porch, which slopes to the north, is supported by finely turned columns which are connected, below by simple balusters, and above by scores of turned spindles. The rest of the facade contains, on the ground floor beyond the porch, a central glass and two-panelled door, and an elongated single pane double-hung sash window to the west. All windows, including those on the turret, are identical in treatment (1/1 with louvered black shutters) and differ only in size. Above the porch, the second floor is the same as the first, except that the central bay is a window. Above this is the imbricated shingled corner turret, now a full hexagon, but with still only 3 northern windows, at the corner between two similarly shingled pedimented gables which spread over their respective facades (east and north). This skyline massing is one of the house's most interesting features, a massing enlivened by the hexagonal conical roof of the turret (complete with ball finial), and by the size differences between the gables (the eastern is larger and possesses a double window). These roofs are covered with black asbestos shingles.

Below the eastern gable, the east front stretches 4 bays to the south (the gable only covers the northern 2 bays). All windows are similarly treated and are identical to those on the north, except that the third window on each floor (counting from the north) is smaller. This facade is entirely covered in white clapboard and its gable roof is covered with black corrugated sheet metal.

There is a 1 story shed roofed addition to the south which has, on its south front, an elongated 1/1 window. Otherwise the south front is 3 bays wide with a small porch covering the western 2 bays. There is a central 5 panelled ground floor door; other bays are 1/1 windows. A small square flat-capped furnace flue rests in the center of this gable roofed section.

BUILDER/ARCHITECT

Paul A. Zimmerman

STATEMENT OF SIGNIFICANCE

Number 228 East Main Street, is a refreshing architectural rarity in Westminster. Its "soul" is extremely clear, a normal Westminster small wood frame house of 3 bays, 2½ stories, side hall. However, its builder, Paul A. Zimmerman, adapted this basic form to fit the aesthetic-intellectual needs (fashions) of the day. Zimmerman found it easy to update the basic shell, enlivening the skyline by adding the corner tower and the different sized gables, by using imbricated shingles, and by stringing scores of turned spindles under the eaves of the front porch. This totally 3-dimensional building marks a change in treatment, as many of the town's simple buildings could easily be read as paintings; this is one that more closely resembles sculpture.

The land, the eastern section of lot 41, remained unimproved until bought by Paul A. Zimmerman on September 21, 1905. Zimmerman used the existing building (number 226 East Main) as rental property, while he and his family lived at the nearby built (in 1906, according to his daughter, the present owner) house.
